

# IgG PROTECT

## RECOMMENDED USE

- Helps to support the immune system

## IMMUNE HEALTH

IgG Protect is a concentrated (40%) immunoglobulin G (IgG) formula designed to support the immune system. The immunoglobulin and growth factors in colostrum can promote passive immunity, or the transfer of immunity from one organism to another, as bovine colostrum is considered a universal donor to human colostrum.<sup>1</sup> IgG Protect helps to support the immune system within the upper respiratory tract. Consistency in potency and purity of colostrum extracts is a primary concern for clinicians. IgG Protect is manufactured using advanced filtration and purification techniques and provides 1,000 mg IgG per serving.

### Overview

Colostrum is easily digestible and enhances the immune system. An optimally functioning immune system prevents unwanted toxins and molecules from disturbing the body's natural homeostasis. Colostrum naturally includes immune factors, amino acids, nucleotides and growth factors which provide several benefits to human immune health by functioning against microorganisms.<sup>2</sup> There are five main immunoglobulins, but the most common is IgG, which accounts for 75-80% of all serum antibodies in the body. IgG plays a major role in immune system function.

### Broad-Range Specificity Immunoglobulins

Research has shown that IgG can be effective in neutralizing microorganisms found in the gastrointestinal tract. Colostrum not only includes high quantities of IgG, but also several factors that may positively impact the immune system. Many studies note the use of bovine colostrum to enhance passive immunity to aid with immune challenges, especially when entering by way of the gastrointestinal tract.

### Recommended Dose

**Adults:** Take 4 capsules once per day. For prolonged use, consult a health care practitioner.

### Medicinal Ingredients (per dose capsule)

Bovine Colostrum  
(*Bos taurus* – Colostrum, standardized to 40% IgG) (Tegricel™) .....625 mg

### Non-Medicinal Ingredients

Hypromellose, Magnesium Stearate.

### Risk Information

Consult a health care practitioner prior to use if you have: a history of cancer, diabetes, liver or kidney disease or if you have been instructed to follow a low protein diet or if you suffer from an immune system disorder (e.g. Crohn's disease, myasthenia gravis, multiple sclerosis, rheumatoid arthritis, systemic lupus erythematosus, HIV/AIDS, etc.) or if you are taking immunosuppressants or if you are pregnant or breastfeeding. Do not use this product if you have a known allergy/hypersensitivity to cow's milk.

To be sure this product is right for you always read and follow the label.
